PREFACE

Excel Standard Social Studies, Pupils' Book Five has been developed basing on the revised Primary Five Social Studies Syllabus as prescribed by the new curriculum of the National Curriculum Development Center (NCDC). The book contains accurate, relevant and current information covering all topics in all terms of the year in their order. It is intended to guide both teachers and learners.

The pupil's book cares for the interests of the learners in terms of simple and concise language used, simplified content to cater for all learners with different abilities and clear illustrations to make learning enjoyable through observation. Key words for each topic have also been included in order to enrich the learner's vocabulary and mastery of concepts.

The topics have well organised, relevant, and easy to understand notes and facts. It is written in a simple language and is well aided with maps and illustrations/diagrams where necessary to ease understanding.

The book is remarkably precise but detailed in content with no fact left hanging. It has been mainly written for Primary Five in a language that is suitable for both rural and urban Pupils. The book can therefore be used with minimum teacher guidance.

The book has inbuilt and continuous assessment activities at the end of topic. These questions are to help the learners to test their understanding of the concepts covered and are to enable the teacher to track progress as coverage goes on. This also makes the book convenient for individual and class learning by the pupils.

The content of the book has been enriched to enable learners get solutions to the three main levels of assessment at primary level that is to say: Knowledge, Comprehension and Application.

The book is intended to provide learners with knowledge, skills and the desired attitudes and values of Social Studies and the Environment that are important to prepare learners for final assessment of the primary level.

The book is written and developed by experienced teachers of Social Studies and Religious Education and we welcome all comments on the publication with an open mind for the improvement in the teaching and learning of Social Studies. TOPIC 1:

LOCATION OF UGANDA ON THE MAP OF EAST AFRICA.

DISTRICTS THAT FORM UGANDA.

- ✚ A district is an administrative area at the level of Local Council Five (LC V)
- ✚ Uganda is divided into districts mainly to ease administration.
- ✚ Chairperson LC V is the political head of a district.
- ✚ Districts in Uganda are grouped into regions, and each region is divided into sub-regions according to the customs of the people in that area.

Regions that form Uganda.

- ❖ Central region.
- ❖ Northern region
- ❖ Western region
- ❖ Eastern region

Sub-regions found in each region of Uganda.

<i>Region of Uganda</i>	<i>Sub-region</i>	<i>Districts</i>		
Central region	Buganda sub-region	-Kampala	-Mpigi	
		-Masaka	-Mityana	
Northern region	Acholi sub-region	-Luwero	-Kalangala

	Bukedi sub-region	-Kapchorwa	-Bukwo	-Kween
		-Pallisa	-Kibuku	-Budaka
		-Tororo	-Busia	

REGIONS THAT MAKE UP UGANDA.

Reasons why Uganda is divided into districts.

- ❖ To ease administration.
- ❖ To extend social services nearer to people.
- ❖ To create more job opportunities to people.

Disadvantages of creating more new districts.

- ❖ It leads to separation of communities/ tribes.
- ❖ It leads to high administrative costs.
- ❖ It makes equal distribution of resources difficult.

HIGHLAND DISTRICTS

- ✚ These are districts which are located in areas of high altitude.
- ✚ Such districts usually have many hills and mountains.
- ✚ Altitude is the height above the sea level.

Examples of highland districts.

- | | |
|-------------|--------------|
| ❖ Mbale | ❖ Bundibugyo |
| ❖ Kapchorwa | ❖ Kasese |
| ❖ Kabale | ❖ Moroto |
| ❖ Kisoro | ❖ Rukungiri |

Economic activities that are commonly carried out in highland districts.

- | | |
|----------------|----------|
| ❖ Tourism | ❖ Mining |
| ❖ Crop growing | |

Problems faced by people living in highland districts.

- | | |
|-----------------------|---|
| ❖ Landslides | ❖ Poor transport network |
| ❖ Severe soil erosion | ❖ Difficulty in agricultural mechanisation. |

Possible solutions to the problems facing people living in highland districts.

- ❖ By rearing donkeys to use them as means of transport.
- ❖ By constructing winding roads.
- ❖ By practising afforestation and reafforestation to control landslides.
- ❖ By terracing, contour ploughing and strip cropping to reduce soil erosion.

Note:

- ✓ Heavy rainfall is the major cause of landslides in highland areas.
- ✓ Landslides can be controlled in highland areas by planting more trees.

- ✓ *Ground transport is very poor in highland areas because it is very difficult and expensive to construct roads in highland areas.*
- ✓ *Agricultural mechanisation is so poor in highland areas because the steep slopes make the use of tractors difficult.*
- ✓ *Road transport can be improved in highland areas by constructing winding roads.*
- ✓ *People living in Kapchorwa district rear donkeys mainly to use them as means of transport.*

ISLAND DISTRICTS.

- ✚ **An island** is an area of land which is completely surrounded by a water body.
- ✚ The island districts in Uganda are found in Lake Victoria.

Examples of Islands districts.

- ❖ Kalangala
- ❖ Buvuma

Economic activities that are commonly carried out in Island districts.

- ❖ Fishing.
- ❖ Crop cultivation (oil palm growing, maize, banana, potatoes)
- ❖ Lumbering
- ❖ Trading.
- ❖ Tourism due to presence of Ssesse forest, Ngamba island which is famous for Chimpanzees

Benefits enjoyed by Island districts.

- ❖ They get easy access to water.
- ❖ They have fertile soils.
- ❖ They receive plenty of rainfall.

Problems facing people living in Island districts.

- ❖ Poor road transport.
- ❖ Attacks from aquatic animals eg. crocodiles.
- ❖ Lack of hydro electricity
- ❖ Floods
- ❖ Poor social service delivery.

- **Note:** -There is no hydro electricity in Kalangala and because it is very expensive to fix electric poles in water of lake Victoria to these districts.

Possible solutions to the problems facing Island districts of Uganda.

- ❖ By using other sources of energy eg. solar energy
- ❖ By employing more social service providers.
- ❖ By providing better means of water transport.
- ❖ By building better social service centres in island districts.
- ❖ By paying attractive salaries to people who provide social services in island districts.

MAPS AND PICTURES.

- ✚ **A map** is a drawing/ representation of an object as seen from above.
- ✚ Maps show how objects look like when viewed directly from above.
- ✚ We use symbols to help us understand and interpret a map of a detailed area.
- ✚ The boundary of a map determines the size and shape of the map.
- ✚ **A picture** is a representation of an object as seen from above.
- ✚ All features on a picture can be clearly seen as real objects.
- ✚ Pictures are more detailed than maps.

Maps and Pictures of different objects

<i>Object name</i>	<i>Picture</i>	<i>Map</i>
a tree		
a plate		
a pot		
a house		
a chair		
a cup		
a hut		
a car		
a table		

Similarity between maps and pictures.

- Both are representations of objects.

Types of maps.

- (i) Political maps. These maps show boundaries of villages, counties, districts and countries.
- (ii) Topographic maps. These maps show physical features/ landforms of a given area.eg.mountains etc.
- (iii) Flow-line maps. These show movement of people, goods, animals etc.
- (iv) Thematic maps. These show various social and economic themes eg. trade, energy.

Importance of maps.

- ❖ They are used for locating places.
- ❖ They help travelers to plan for routes to take while on their journeys.
- ❖ They help people to know the relief, climate and vegetation of different areas.

ELEMENTS OF A MAP.

- ❖ A compass direction
- ❖ A scale
- ❖ A title/heading
- ❖ A frame
- ❖ A key

Importance of different elements of a good map.

<i>Element</i>	<i>Importance</i>
❖ A compass direction	❖ It helps to show the direction of places on a map. -A map reader may fail to know the direction of places shown on the map if he/she reads a map without a compass direction.
❖ A title/ heading	❖ It helps one to know what the map is all about. -One who reads a map without a title may fail to know what the map is all about.
❖ A key	❖ It helps a map reader to interpret symbols used on a map. -A key gives detailed information about the map. -A map reader may fail to interpret/ know the meaning of symbols used on a map if he/she reads a map without a key.
❖ A scale	❖ It helps a map reader to calculate the actual ground distance on a map. -A map reader may fail to calculate the actual ground distance between places on the map if he/she reads a map without a scale.
❖ A frame	❖ It shows the extent of the area represented by the map.

MAP SYMBOLS.

🗺️ These are features that are used to represent real objects on a map.

Why symbols are used on maps.

- ❖ To avoid congestion on the map.
- ❖ To make map reading easy.
- ❖ To ensure neatness of a map.

Common symbols used on maps.

<i>A rift valley</i>	<i>waterfall</i>	<i>A dam</i>	<i>A canal</i>	<i>A swamp</i>
<i>A quarry</i>	<i>A hill</i>	<i>airport</i>	<i>contours</i>	<i>a factory</i>
<i>Railway line</i>	<i>A port</i>	<i>hospital</i>	<i>mountain peak</i>	<i>permanent lake</i>
<i>Seasonal lake</i>	<i>church</i>	<i>A bridge</i>	<i>Seasonal river</i>	<i>Compass direction</i>

A COMPASS DIRECTION

✚ A compass is an instrument used to find direction of places.

✚ A drawn compass is called a *compass rose*.

People who use a compass.

- ❖ Rally drivers
- ❖ Tourists
- ❖ Pilots
- ❖ Mountain climbers
- ❖ Sailors
- ❖ Scouts and girl guides.
- ❖ Soldiers.

A compass direction.

✚ A compass direction is a symbol used on a map to show the direction of places.

✚ The compass points are divided into the cardinal points, semi-cardinal points (secondary points) and tertiary points.

✚ Cardinal points are the four major points of a compass.

These include;

- ❖ North
- ❖ South
- ❖ West
- ❖ East

✚ Secondary points are the directions that lie midway of cardinal points.

✚ Semi-cardinal points lie at 45° from the cardinal points.

These include;

- ❖ South East
- ❖ South West
- ❖ North East
- ❖ North West

A SCALE.

✚ A scale helps a map reader to calculate the actual ground distance on a map.

✚ A map reader who reads a map without a scale may fail to calculate the actual ground distance on a map.

✚ A scale is only found on accurate maps.

✚ A sketch map is a map which is not drawn to scale while an accurate map is a map which is drawn to scale.

Types of scales.

(i) Linear scale.

This is the type of scale drawn using lines that are divided into equal parts.

Example;

Find the actual ground distance between town **Q** and town **S** if there is a distance of 6cm between the two towns on the map.

Solution;

$$1\text{cm} = 100\text{km}$$

$$6\text{cm} = (6 \times 100)\text{km} \\ = 600\text{km}.$$

Therefore, the actual ground distance between Town Q and Town S is 600km.

(ii) Representative scale/ fractional scale.

This is the type of scale written as a mathematical fraction.

It can also be written as a ratio. eg. $\frac{1}{100\text{km}}$ or 1:100km.

(iii) Statement scale.

This type of scale can be given as a statement or words.

Eg. 1cm on a map represents 100km on the ground.

LOCATING UGANDA USING THE GRID REFERENCE SYSTEM

Ways of locating places.

- ❖ By using a compass.
- ❖ By using neighbouring places.
- ❖ By using landmarks.

Ways of locating places on a map

- ❖ Using a compass direction.
- ❖ Using neighbouring places.
- ❖ Using physical features.
- ❖ Using lines of latitude and lines of longitude (grid reference system)

GRID REFERENCE SYSTEM

- ✚ This is the method of locating places using lines of latitude and lines of longitude.
- ✚ Grid refers to the network of horizontal and vertical lines used as references co-ordinates to locate places on a map.

(i) LINES OF LATITUDE

- ✚ These are imaginary lines drawn on maps or globe from East to West.
- ✚ The general name for all lines of latitude is parallels because they do not meet at any point.
- ✚ Latitude is the distance in degrees North or South of the equator.
- ✚ Lines of latitude help in determining climate of places.
- ✚ Lines of latitude help us to tell how far a place is North or South of the Equator.

Major lines of latitude.

- The Equator (0°)
- Tropic of Cancer ($23\frac{1}{2}^{\circ}\text{N}$)
- Tropic of Capricorn ($23\frac{1}{2}^{\circ}\text{S}$)
- Arctic circle ($66\frac{1}{2}^{\circ}\text{N}$)
- Antarctic circle ($66\frac{1}{2}^{\circ}\text{S}$)

THE EQUATOR

- ✚ The Equator divides the world into two equal parts (hemispheres)
- ✚ The Equator is marked 0° because it is the starting point for all latitude readings.
- ✚ The Equator is the most important line of latitude because it crosses the world at the centre.
- ✚ All districts which are crossed by the equator lie in both the Northern and Southern hemisphere.
- ✚ Note:
 - ✚ A **globe** is the model of the earth
 - ✚ The Equator crosses **lake George** and **lake Victoria** in Uganda.
 - ✚ A **hemisphere** is a half part of the world as divided by the equator or prime meridian.
 - ✚ The area between the Tropic of cancer and the Tropic of Capricorn is called the **Tropical region**.

Districts crossed by the Equator in Uganda

- | | |
|-------------|---------------|
| ❖ Ibanda | ❖ Kalungu |
| ❖ Kasese | ❖ Bukomasimbi |
| ❖ Mpigi | ❖ Buvuma |
| ❖ Mukono | ❖ Sembabule |
| ❖ Wakiso | ❖ Lyantonde |
| ❖ Namayingo | ❖ Kamwenge |
| ❖ Mayuge | |

Importance of lines of latitude

- They help to determine the climate of a place.
- Lines of latitude and lines of longitude are used to locate places on a map.

Location of the Equator on the map of Uganda

**Location of the Equator at
Kayabwe along
Kampala-Masaka road**

Practical activity;

Use the political map of Uganda and identify all districts that;

- (i) Are crossed by the Equator.
- (ii) Completely lie in the Northern hemisphere
- (iii) Completely lie in the Southern hemisphere.
- (iv) Lie in both the Northern and the Southern hemisphere

(ii) LINE OF LONGITUDE.

- ✚ Lines of longitude are imaginary lines drawn on maps and globe from the North pole to the South pole
- ✚ They are also known as meridians.
- ✚ Lines of longitude meet at the poles of the earth.

Major lines of longitude.

- ❖ The Prime meridian/ Greenwich meridian (0°)
- ❖ The International dateline. (180° E or W)

The Prime Meridian/ Greenwich Meridian

- ✚ The Prime meridian is also called the **Greenwich meridian** because it crosses Greenwich town in London.
- ✚ The Prime meridian is marked 0° because it is the starting point for all longitude readings.
- ✚ The Prime meridian divides the world into the Eastern and Western hemisphere.
- ✚ All countries crossed by the Prime meridian lie in both the Eastern and Western hemisphere.

Note;

- **The Prime meridian** helps in telling international time.
- **The International dateline** separates one day from the next day.
e.g. East of the International dateline may be Wednesday while West of it is Tuesday.

Using the Prime meridian to tell the international time.

- ✚ A time zone is an area/region with the same standard time.
- ✚ Different regions of the world have different time zones according to the distance from the Prime meridian.
- ✚ Places which are in the same time zone have the same standard time.
e.g. Uganda, Kenya and Tanzania are in the same time zone, and so have the same standard time. (East Africa standard time)
- ✚ East Africa lies at longitude 45° while Rwanda and Burundi are 30°E of the Greenwich meridian.

➤ Note:

- ✓ The rotation of the earth on its axis causes days and nights.
- ✓ The earth makes one complete rotation of 360° in one day (24 hours). Therefore, it rotates through an angle of 15° in every 1 hour (60 min).
- ✓ Every 15° E or W of the Greenwich meridian is a time zone.
- ✓ When you travel 15° westwards, you lose an hour while travelling 15° eastwards makes you gain an hour.
- ✓ We usually add (+) hours for places which are in the East and subtract (-) the time when finding the time for places which are in the West.
- ✓ Changing of the time to and from 24hr clock (by either adding or subtracting 12 hrs) affects the units in which the time is given. (ie. From am to pm and viceversa).
- ✓ Time in each time zone is calculated basing on the Greenwich mean time (GMT) which is at 0° longitude.

Example 1:

1. Find the time in East Africa which is 45° if it is 1:00pm at GMT.

Solution,

$$15^{\circ} = 1\text{hr}$$

$$45^{\circ} = \left(\frac{45}{15}\right) \text{ hrs.}$$
$$= 3\text{hrs}$$

$$\begin{array}{r} \text{Time in East Africa} = 1:00\text{pm} \\ + 3.00\text{hrs} \\ \hline 4:00\text{pm} \end{array}$$

OR:

Therefore, time in East Africa is **4:00pm**

Therefore, time in East Africa is **4:00pm**.

Example 2.

2. What time will it be in country T which is 60°W if it is 3:00pm in Ghana?

Solution,

$$15^{\circ} = 1\text{hr}$$

$$60^{\circ} = \left(\frac{60}{15}\right) \text{ hrs}$$
$$= 4\text{hrs}$$

$$\begin{array}{r} \text{Time in country T} = 3:00\text{pm} (+12\text{hours}) \\ - 4.00\text{hrs} \\ \hline = 15.00\text{hrs} \\ - 4.00\text{hrs} \\ \hline 11:00\text{am} \end{array}$$

OR:

Therefore, time in country T will be **11:00am**

Therefore, the time in country T will be **11:00am**.

Locating Uganda using the grid reference system.

- ✚ Uganda is located between latitude 4°N and 1°S and longitude 29°E and 35°E of the Greenwich meridian.
- ✚ The farthest point in the North is Zulia while Kisoro is the farthest in the South.
- ✚ Ishaka is the farthest town in the West while Amudat is the farthest in the East.

Location of Uganda using the grid reference system.

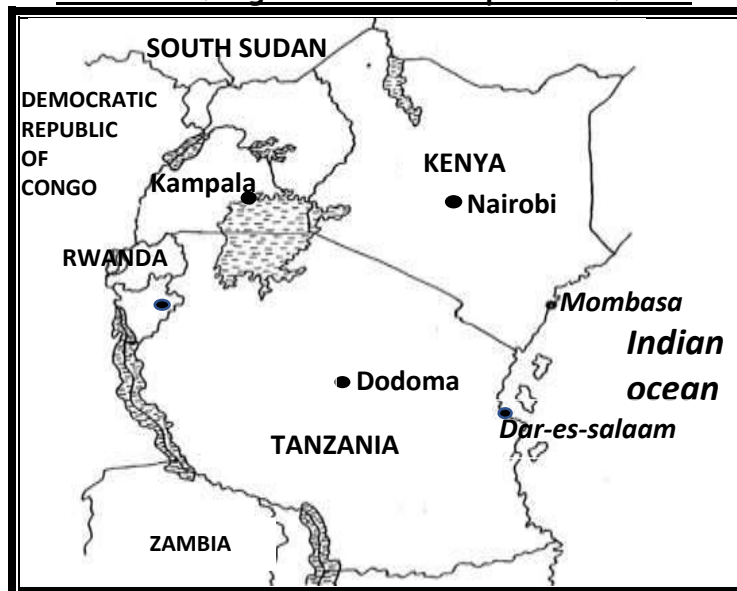

UGANDA'S NEIGHBOURS.

- ✚ Uganda is bordered by five (5) countries.

These include;

- ❖ Kenya in the East
- ❖ Democratic Republic of Congo in the West
- ❖ Tanzania in the South
- ❖ Rwanda in the South West.
- ❖ South Sudan in the North

Location of Uganda on the map East Africa.

Countries that neighbour Uganda.

<i>Country</i>	<i>Direction from Uganda</i>	<i>Direction to Uganda</i>	<i>Capital City</i>	<i>Current President</i>
Kenya	East	West	Nairobi	H.E Uhuru Kenyatta
Tanzania	South	North	Dodoma	H.E John Pombe Magufuli
DRC	West	East	Kinshasa	H.E Felix Tshisekedi
South Sudan	North	South	Juba	H.E Salva Kiir
Rwanda	South West	North East	Kigali	H.E Paul Kagame

UGANDA AS A LAND LOCKED COUNTRY

- ✚ A land locked country is a country without a coastline.
- ✚ Uganda is a land locked country because she has no coastline.
- ✚ Uganda usually uses her neighbours' sea ports when importing and exporting her goods.

Land locked countries that border Uganda.

- ❖ Rwanda
- ❖ South Sudan

Seaports that handle Uganda's imports and exports.

- ❖ Port Mombasa in Kenya
- ❖ Port Dar-es-salaam in Tanzania
- ❖ Port Matadi in Democratic Republic of Congo

Note:

- ✓ **A Seaport** is a place at the coast where ships anchor.
- ✓ Uganda mostly imports her goods through port Mombasa because port Mombasa is nearer to Uganda than other sea ports.

Problems faced by land locked countries in Uganda.

- ❖ High taxation on overseas goods/imports.
- ❖ Delay of overseas goods in transit.
- ❖ High transport costs when importing goods.
- ❖ There is limited trade with the rest of the world.
- ❖ High prices for imported goods.

➤ **Note:**

- ✓ **Smuggling** is the illegal importation and exportation of goods.
- ✓ Smuggling reduces market for locally manufactured goods.
- ✓ It may also lead to importation of low quality goods into the country.
- ✓ **Imports** are goods that are brought in a country from other countries eg. Vehicles Uganda imports from Germany.
- ✓ **Exports** are goods a country sells to other countries. eg. food Uganda sells to South Sudan.

Steps land locked countries can take/ have taken to solve some of the above challenges.

(How Uganda can solve the problems she faces due to her location)

- ❖ By using air transport when importing goods.
- ❖ By using various sea ports when importing goods.
- ❖ By promoting domestic industrial production.
- ❖ By joining common markets in the region. eg. East African Community (EAC)
- ❖ By improving security along the high ways.

NON-LAND LOCKED COUNTRIES.

- ✚ A Non-land locked country is a country which has a coastline.
- ✚ Non-landlocked countries have their own sea ports that handle their imports and exports.

Non-landlocked countries that neighbour Uganda.

- ❖ Kenya
- ❖ Tanzania
- ❖ Democratic Republic of Congo

Major sea ports of Uganda's neighbours.

<i>Non landlocked country</i>	<i>Sea port</i>
Kenya	Port Mombasa
Tanzania	Port Dar-es-salaam
Democratic Republic of Congo	Port Matadi

Benefits enjoyed by Non-land locked countries.

- ❖ They pay less taxes on their imported goods.
- ❖ They earn income through taxing goods for land locked countries that pass through them.
- ❖ They can easily trade with other countries.

Note:

- ✓ *Hinterlands* are areas in a country that are far away from the coast or main cities.

Reasons why Uganda should cooperate with her neighbours

- ❖ To widen market for her goods.
- ❖ To use her neighbours' sea ports to handle her exports and imports.
- ❖ To get goods which she cant produce locally.

(i) BLOCK MOUNTAINS

- ✚ These mountains are also called horst mountains.
- ✚ Block mountains were formed as a result of faulting.
- ✚ Faulting is the cracking/ breaking of rocks in the earth's crust.
- ✚ The central block between the two faults is lifted up by compressional forces forming a block mountain.

Forces that led to the formation of a block mountain

- Compressional forces
- Tensional forces.

Example of a block mountain in Uganda

- Mountain Rwenzori

A diagram showing the formation of a block mountain due to Compressional forces.

MOUNTAIN RWENZORI.

- ✚ It is the highest mountain in Uganda.
- ✚ Mountain Rwenzori is located in Western Uganda.
- ✚ It is surrounded by districts like Kasese, Kabalere and Bundibugyo.
- ✚ It forms a boundary between Uganda and Democratic Republic of Congo.
- ✚ It has many peaks ie Margherita as the highest and Stanley as the second highest.
- ✚ It is called a range because it has many peaks.
- ✚ Margherita is snowcapped throughout the year because it is above the snow line.
- ✚ Henry Morton Stanley was the first European explorer to see mountain Rwenzori.
- ✚ He named it the "mountains of the moon" because of the snow on its peak which glitters like a moon.
- ✚ Mountain Rwenzori is a source of rivers like River Mubuku, river Sebwe, River Nyamwamba, River Mpanga. These rivers flow from molten snow on mountain rivers.

VOLCANIC MOUNTAINS.

- ✦ These are mountains formed as a result of volcanicity.
- ✦ Volcanicity is the process by which magma is forced onto the earth's surface through a vent.
- ✦ Volcanicity can also be called *volcanic activity* or *volcanic eruption*.
- ✦ A volcano is a mountain with a vent through which magma is forced through the earth crust and onto the earth's surface.
- ✦ Magma refers to the molten rock in the earth crust.
- ✦ Lava refers to the molten rock on the earth's surface.

A diagram showing the formation of a volcanic mountain

Extinct volcanoes	These are mountains that do not show any signs of erupting.	• Mountain Elgon • Mountain Napak • Mountain Morungole • Mountain Zulia • Mountain Kadam

Importance of volcanicity

- ❖ It leads to formation of fertile volcanic soils which are favourable for crop growing.
eg. Arabica coffee is mainly grown on the slopes of mountain Elgon due to the presence of fertile soils.
- ❖ Volcanic mountains attract tourists who bring in income.

Dangers of volcanicity.

- ❖ It leads to death of people and animals.
- ❖ It leads to destruction of property.
- ❖ It leads to air pollution.

Other features formed as a result of volcanicity.

 - ✓ **An inselberg** is an isolated hill that stands above the general level of the surrounding land eg. Labwor hill in Karamoja, Musaijamukuru hill in Hoima, Osukuru hill in Tororo.
 - ✓ These inselbergs attract tourists who bring in income and are also a major source of minerals eg. The Osukuru hills which provide limestone used for making cement.
- ❖ Lava dammed lakes
- ❖ Hot springs /geysers eg. Kitagata hotsprings in Bushenyi, Sempaya hotsprings in Bundibugyo
 - ✓ Hot springs attract tourists and also help in generation of geothermal energy.

- ❖ Bakiga
- ❖ Bafumbira.

Crops mainly grown on slopes of mountain Mufumbiro

- ❖ Potatoes
- ❖ Sorghum
- ❖ Vegetables
- ❖ Pyrethrum

➤ Note:

- ✓ The high population/ over population in Kigezi sub-region has led to the division of land into small plots in this area (**Land fragmentation**)
- ✓ Land fragmentation hinders agricultural mechanisation and also leads to low food production.

MOUNTAIN MOROTO.

- ✚ It is located in the North Eastern part of Uganda.
- ✚ Its highest peak is called Sokdek.
- ✚ Sogolomon is the second highest peak of mountain Moroto.
- ✚ The Karimojong tribe mainly lives on the slopes of mountain Moroto.
- ✚ The Karimojong mainly carry out pastoralism.
- ✚ The area around mountain Moroto receives very little rainfall because it receives dry winds from the North East.

- ❖ Severe soil erosion.
- ❖ Much coldness.
- ❖ Landslides due to heavy rainfall.
- ❖ Poor agricultural mechanisation.
- ❖ Poor road transport.

Why transport is very poor in highland areas.

It is difficult and expensive to construct roads in mountainous areas.

Note:

- People living in highland areas (Kapchorwa) rear donkeys to use them as means of transport.
- Heavy rainfall received in highland areas is the major cause of landslides.
- Landslides can be reduced in highland areas through planting trees.
- Road transport can also be improved in highland areas by constructing winding roads.

- The government has relocated people of Bududa to safer plains and plateaus to save them from landslides.

Why agricultural mechanisation is poor in mountainous areas.

The steep slopes make the use of tractors difficult and very expensive.

THE RIFT VALLEY.

- ✚ A rift valley is a long and wide depression on the earth's surface with steep sides.
- ✚ The steep sides of a rift valley are called escarpments.
- ✚ The rift valley was formed as a result of faulting.

- | | |
|---------------------|--------------------------------------|
| ❖ Altitude. | ❖ Nearness to water bodies/Drainage. |
| ❖ Latitude. | ❖ Wind movement. |
| ❖ Vegetation cover. | ❖ Human activities |

(i) Altitude

✚ Altitude is the height above the sea level.

❖ Temperature reduces with the increase in altitude.

✚ The lower parts of a mountain are warmer and have higher temperatures than the higher parts of the mountain.

✚ The higher the altitude, the cooler the temperature, and the lower the altitude, the hotter the temperature eg. Mbale is cooler than Kampala because Mbale is on a higher altitude than Kampala.

(ii) Vegetation

❖ Places with thick vegetation usually receive plenty of rainfall while those that have scanty vegetation usually receive very little rainfall.

Note:- Vegetation modifies climate of an area by helping in the formation of convectional rainfall through transpiration.

(iii) Human activities

❖ Some human activities affect climate positively while others affect climate of an area negatively.

Human activities that affect climate of an area positively.

- Afforestation
- Reafforestation
- Agro-forestry

Human activities that affect climate of an area negatively.

(iv) Latitude.

✚ Latitude is the distance in degrees North or South of the equator.

❖ Areas which are near the Equator are hotter than those which are far away from the equator.

✚ Low latitude areas are areas which are near the equator, and are usually very hot.

✚ High latitude areas are areas which are far away from the Equator and are usually cool.

✚ Areas which are far away from the Equator are usually very cool because they receive slanting sun rays which travel a very long distance to the earth.

Note;

- *Most parts of Uganda are always hot because the sun is overhead Uganda throughout the year.*
- **The Revolution of the earth** (in 365days) causes changes in seasons. ie. wet season and dry season.
- **Tropical region** is the area of land lying between the Tropic of cancer and Tropic of capricorn.
- **Equinox** is the time of the year when the sun is overhead the equator.
- *The days and nights are always equal whenever the sun is overhead the equator.*
- *Very high temperatures are experienced around equinoxes.*
- **Solstice** is the time of the year when the sun is overhead the tropics.

A diagram showing the time when the sun is overhead major lines of latitude.

(v) Nearness to water bodies (Drainage)

- ❖ Areas near large water bodies usually receive more rainfall than those which are far away from large water bodies.
- ✚ Areas near large water bodies usually receive convectional rainfall.
- ✚ Winds that blow over large water bodies pick a lot of moisture which rises and condenses to form convectional rainfall.

Note: -Water bodies modify climate by helping in the formation of convectional rainfall through evaporation.

Characteristics of convectional rainfall

- It is mostly received in the afternoon.
- It is usually accompanied by lightning and thunderstorms.
- It is mostly received in areas that experience a lot of evaporation and transpiration.

(vi) Prevailing winds.

- ❖ Areas that receive warm moist air receive plenty of rainfall while those that receive dry winds usually receive plenty of rainfall.

BREEZES.

- ✚ A breeze is the movement of air from a cool region to a warm region.

Types of breezes.

- Sea breeze
- Land breeze

(i) Sea breeze

(ii) Land breeze

- ✚ This is the movement of cold air from land towards the sea.
- ✚ It takes place during the night.
- ✚ At night, the land cools faster than the sea.
- ✚ The warm air from the sea where pressure is low rises and the cooler air blows from land towards the sea to replace it.

RELIGIOUS WARS IN BUGANDA

- ✚ In September 1888, Mwanga planned to get rid of remaining Christian and Muslim leaders by leaving them to starve on an island in crocodile-infested Lake Victoria. Word of his plan leaked out and a rebellion by Christians and Muslims together brought Mwanga's brother Kiweewa to the throne.
- ✚ In October 1888, the Muslims seized power, expelled the Christian leaders and, when Kiweewa refused to be circumcised, deposed and killed him, replacing him with another brother, Kalema.
- ✚ In December 1888, Mwanga won support from Christians and in April 1889 advanced against the Buganda capital. He was defeated, but the Christian forces, led by the Protestant chief Apollo Kaggwa, retook the capital, enabling Mwanga to enter it triumphantly on 11 October 1889.
- ✚ The Muslims took refuge in the neighbouring kingdom of Bunyoro, which helped them to return victoriously in November 1889, but they suffered a decisive defeat in February 1890 and withdrew again to Bunyoro.

- ✦ In 1888, Britain authorised the Imperial British East Africa Company to administer the East African territory assigned to Britain in its 1886 treaty with Germany.
 - ✦ In November 1889, Mwanga asked the Company's agent Frederick Jackson for help. Jackson hesitated to accept the request, because he had been given orders not to enter Buganda.
 - ✦ Dr. Carl Peters, an agent of the German East Africa company (GEACo), learning of Mwanga's appeal, decided to respond to it. He arrived at Mengo, Mwanga's new capital, a fortnight after the February 1890 defeat of the Muslims. Since these still presented a threat, Mwanga accepted his offer of a treaty.
 - ✦ The agreement that Peters made with Mwanga was nullified by the 1 July 1890 treaty between Britain and Germany, which extended inland the line of division between their areas of influence in East Africa, leaving Buganda in the British sphere.
 - ✦ The Imperial British East Africa Company (IBEACO) sent Frederick Lugard, its military administrator, to Mengo, where in December 1890 he got Mwanga to accept for a period of two years an agreement with the Company. This agreement was advantageous for Mwanga when the Muslims in Bunyoro made another attempt to recover power.
 - ✦ Friction between the Catholic and the Protestant parties led to fighting in January 1892 in Mengo.
 - ✦ Lugard supported the Protestants against the stronger Catholic side in the fighting, forcing Mwanga and the Catholics to flee. Lugard managed to persuade Mwanga to return from German territory, where he had taken refuge, to Mengo on 30 March 1892 and to make a new treaty. This treaty assigned separate areas to Protestants (the largest area), Catholics and Muslims (only a small area); Mwanga himself nominally became a Protestant.
-
- ✦ With the aid of the Church Missionary Society, which used the deaths of their martyrs to win broad public support in Britain for acquiring Uganda, Lugard then successfully dissuaded Prime Minister William Ewart Gladstone and his cabinet from abandoning Uganda. The powers of the company were transferred to the British Crown on 1 April 1893 and on 27 August 1894, Mwanga accepted Buganda being made a British protectorate.
 - ✦ However, on 6 July 1897 he declared war on the British. Defeated on 20 July in Buddu (in today's Masaka District), an area assigned to Catholics in the 1892 treaty, he again fled to German East Africa (Tanzania). He was declared deposed on 9 August. After a failed attempt to recover his kingdom, he was exiled in 1899 to the Seychelles, where he was received into the Anglican Church. He died in 1903, aged 35.

- ✚ Dense population is the situation when an area has many people compared to the size of the land.
- ✚ Sparse population is the situation when an area has very few people compared to the size of the land.
- ✚ Optimum population is when the number of people living in an area can be well supported by the available resources.

Population distribution in our district.

Area A	Area B	Area C
		
Dense population	Optimum population	Sparse population

Types of population distribution.

- Dense population.
- Sparse population.

SPARSE POPULATION

✚ Sparse population is when an area has very few people compared to the size of the land.

Areas that are sparsely populated.

- Semi-arid areas
- areas affected by civil wars
- steep slopes
- forested areas.
- rural areas
- areas affected by natural disasters.

Why the above areas are sparsely populated.

a) Semi-arid areas.

- The areas experience long dry seasons.
- They have infertile soils.
- They experience very high temperatures during day time.
- The areas receive very little.

b) swampy areas

- They are greatly affected by floods during the rainy season.
- They have dangerous aquatic animals that attack people.

c) Forested areas

- They have many disease vectors.
- They harbour many dangerous animals which are dangerous to people.
- The government doesn't allow human settlement in such areas.

d) Steep slopes.

- They have poor transport network.
- They hinder mechanisation of agriculture.

e) Areas affected by civil wars.

- People run away from such areas in order to save their lives.

- They have plenty of minerals which promote mining.

❖ Areas along the major roads.

- Such areas usually have a large market for goods.
- There is easy access to social service centres.

Factors that lead to a dense/ high population.

- | | |
|---|----------------------------------|
| • Reliable rainfall. | • Industrialisation. |
| • Availability of employment opportunities. | • Improved peace and security. |

|-----------------------------|------------------------|
| ❖ Rainfall distribution. | ❖ Government policy. |
| ❖ Employment opportunities. | ❖ Nature of the soil. |
| ❖ Relief of an area. | ❖ Political stability. |
| ❖ Social service provision. | |

How the above factors influence the population distribution of an area.

Rainfall distribution/ climate.

- The areas that receive reliable rainfall are densely populated because they support farming. Areas that receive very little are sparsely populated because they can't support crop growing.

Nature of the soil.

- Areas that have fertile soils are densely populated because they support plant growth. Areas with infertile soils are sparsely populated because they can not support plant growth.

Vegetation distribution.

- Areas that have thick vegetation are not occupied by people because they harbour dangerous animals, vectors and pests.
- The areas with good vegetation cover like savannah grasslands are favourable for human settlement.

Relief.

- Steep slopes of mountains have few people due to land slides, soil erosion and poor transport.
- Plateau areas and gently sloping lands are densely populated due to fertile soils, good drainage and better transport networks.
- Valley areas and plains have a low population due to floods and high temperatures.

Social service provision.

- Areas with good social service provision are densely populated while those with poor social service provision are sparsely populated.

Government policy.

- The government stops people from settling in certain areas like game parks, game reserves, swamps making them sparsely populated.

Political stability.

- Areas that are politically stable are densely populated.
- People take refuge in more peaceful areas compared to those that experience wars.

Urbanisation.

- Developed areas like towns attract many people because they have good jobs and employment opportunities while rural areas are sparsely populated due to poor social services leading to rural-urban migration.

POPULATION DENSITY.

✚ This is the number of people living in an area per square kilometre.

How to determine population density.

Population density = $\frac{\text{total population(people)}}{\text{Total area (km}^2\text{)}}$

Example: An area has a population of 600,000 people, living in an area of 300km², calculate the population density of that area.

$$\begin{aligned}\text{Population density} &= \frac{\text{total population.}}{\text{Total area (km}^2\text{)}} \\ &= \frac{600,000 \text{ people}}{300\text{km}^2} \\ &= 200 \text{ people/km}^2\end{aligned}$$

Therefore, the population density of that area is 200people/km²

Types of population density.

Problems associated/ caused with a High population density.

- Unemployment.
- Shortage of food.
- Easy spread of communicable diseases.
- Development of slums.
- Poor hygienic condition leading to disease outbreak.
- Environmental degradation.
- High crime rate.

Storeyed houses can help to solve shortage of land in towns

- ❖ Empowering the youths to start small scale businesses (projects).
- ❖ By extending electricity to rural areas.
- ❖ Educating people to use modern methods of farming to increase food production.

b) LOW POPULATION DENSITY.

- ✚ This is when an area has a small number of people compared to the available resources.

Advantages of a low population density.

- People have enough land.
- Low crime rate.
- There is enough accommodation.
- Communicable diseases can not easily spread from one homestead to another.
- It promotes conservation of the natural environment in an area.

- There is low market for local goods or imported goods.
- There is low labour force.
- There is low tax base for the government.
